Co-AGE Volunteers

Slovakian-Austrian Network for Intergenerational Volunteering

Volunteering provides great non-formal learning opportunities for young people and plays an important role in developing soft skills that are relevant in the labour market. This Interreg project aims to establish a transnational network of regional stakeholders in the Slovak-Austrian border area so as to support the cross-border commitment of young volunteers and to make use of the personal, social and employability benefits of volunteering. Other major goals are the strengthening of intergenerational solidarity and the promotion of volunteer training.

This project is financially supported by the European Union under the European Regional Development Fund (ERDF) Programme Interreg V-A Slovakia – Austria 2014-2020.

eSMART – Next Generation Web 4.0 Entrepreneurs

eSMART will design and produce a bespoke entrepreneurship curriculum for young digital natives embarking on a career in the CCI sector as Web 4.0 entrepreneurs. The EntreComp Framework will be used as a benchmark for developing the curriculum. The project partners plan to introduce potential learners to the curriculum with a combination of interactive infographics and educational magazines (so-called eduzines). eSMART will also provide essential in-service training for VET teachers and tutors to ensure that they are knowledgeable about the symbiotic Internet and its opportunities for new start-ups, and, more importantly, to build their pedagogical and digital skills to help them harness the potential of online learning for delivering high-quality VET in the current COVID-19 context.

Publics: young people, teachers, trainers

Go-Car-Go Plus

The project's main goal is to arouse students' interest in understaffed professions and make these a more attractive VET option for them by a DIY project activity: building a solar-powered car. However, the product is only an indirect aim in this project that is about environmental awareness, digital skills, and other important future skills such as innovation. Doing project work, the students are familiarised with various occupational fields and professions. This is to help them choose a career or further education pathway after compulsory schooling and to reduce drop-out rates in VET.

Trendig

Aufbau neuer CB Wertschöpfungsketten – Nutzung von Trends und Digitalisierungstools

This project aims to show small companies, one-person companies, founders and start-ups operating in the service sector trends in different areas and, together with experts, to support them in exploiting these trends and the resulting opportunities in their own business activities. Cross-border co-operation between Hungary and Austria and the use of new digitisation solutions are to secure their long-term economic existence.

BFI Oberösterreich

Basisbildung OÖ 2022

The project is aimed at improving basic skills. Small group teaching facilitates drawing on learners' real-life experience. Their needs determine the pace of learning, the choice of topics and the level of difficulty of the assignments. Connected to everyday experience and without time pressure, basic skills may be acquired or expanded.

Du kannst was 4.0

Anerkennung nonformal erworbener Kompetenzen mit Lehrabschluss

In the project "Du kannst was 4.0", apprenticeship qualifications may be gained, through a competence recognition procedure, in the following trades: office administrator, logistics operative, forwarding agent, retail sales, metal technology, waiter / waitress, cook / chef, and HGV or bus driver; others can be added as required.

Validation consists of four steps:

- In an initial interview, participants are informed about the advantages of an apprenticeship, the conditions for it and alternatives to it.
- Next, non-formally acquired job-related competences are recorded in a portfolio and assessed in a first qualification check.
- Subsequently, specific training is provided to fill any knowledge or skills gaps.
- Finally, the Apprenticeship Office of the Salzburg Economic Chamber carries out a second qualification check to evaluate the success of the upskilling. If the qualification requirements are met, an apprenticeship certificate is issued.

Publics: people with a low level of qualification, women, immigrants
