5 Minuten, zur Verbesserung der Grundfertigkeiten und zum Aufbau von Schlüsselkompetenzen in VET

TAKE 5

TAKE 5 is an Erasmus+ project developing innovative, challenge-based learning resources which can be integrated into teaching as short 5-minute units. It is aimed at motivating young vocational learners to enhance their fundamental skills and to build sustainable key competencies for their future working life. The focus is on offering access to learning based on small, activating stimuli in a flexible digital way oriented towards self-efficacy and personal development. This is paralleled by providing modern digital and pedagogical tools for vocational teachers in order to enable high-quality online and hybrid learning.

Publics: young people, young adults, teachers

Programme: Erasmus+

Project number: 2025-1-DE02-KA220-VET-000361224

Project period: 01.11.2025-31.10.2027

Contractor: Jugendförderverein Parchim/Lübz e.V., Germany

Contact: René Bischof, BFI Burgenland, Grazer Straße 86, 7400 Oberwart,

**Co-funded by
the European Union**

BerufeWerkstatt

For primary school pupils it is particularly important to approach abstract matters in a concrete way. In this project, children learn more about various trades and crafts, as well as jobs in tourism, in a playful way. On the project day, the pupils can see which tools are used, they can feel the individual materials and experience in a hands-on way how work in the respective sector is performed.

Publics: pupils

Programme: LEADER

Project number: LE-77-05-BML-UMSETZUNG-2024-24106

Förderung der Rolle von Frauen in grünen Technologien

Net Zero Hero

The goal of the Net Zero Hero Erasmus+ project is to encourage a greater number of women to take part in green technology vocational programmes, and to awaken their interest in STEM professions in sustainability sectors by means of awareness-raising campaigns, by presenting inspiring female role models and by specifically addressing women. A key element here is a customised women's mentoring programme for female vocational learners, to provide assistance and empowerment on their way into the world of green tech. In addition, specific training programmes for teachers, guidance practitioners and instructors are being developed to enhance their understanding of green career options and to proactively support female talents during their training.

Publics: women, teachers, career advisers

Kompetenzenentwicklung und Bewusstseinsförderung der Themenbereiche Industrie 4.0, Green Energy und Digitale Bürgerschaft

IFIT NEXT

IFIT-Next focuses on cross-border cooperation to tackle the challenges of the green and digital transitions. The main goal of the project is to further workers' competencies and skills in the areas of Industry 4.0 and green energy and to enhance their digital skills as well as their awareness of environmental matters. Through a close cooperation between the partner institutions and the labour market, the project subjects are specifically adapted to current demands. The project will contribute to sustainability, improvement of digital skills and strong networks at European level.

Publics: workers, unemployed people, apprentices, pupils

Programme: INTERREG SKAT

MINT-Bildung. Netzwerken. Nachhaltige Perspektiven – weil Zukunft regional beginnt.

Südburgenland denkt MINT

This STEM project run in southern Burgenland focuses on sustainably consolidating STEM (science, technology, engineering and mathematics) education in the STEM regions of Güssing-Jennersdorf and Oberwart. In order to combat the skills shortage and to promote regional development, educational programmes are established in the areas of research, innovation and technology, and specific network are built to link industrial enterprises and educational institutions.

InterSTEAM

InterSTEAM is a project aimed at meeting territorial challenges in the context of the digital transition by pursuing an innovative approach to the promotion of STE[A]M, with the focus on (computer) science, technology, engineering, art and mathematics. It is primarily oriented towards sustainably enhancing the digital skills of students, teachers, as well as SMEs and start-ups. By applying artistic teaching methods, creativity is linked with techno-

logical education in order to foster digital resilience, orientation towards the future, as well as responsible approaches in the educational system and in working life.

BFI Oberösterreich (Upper Austria)

Basisbildung OÖ all in

43 courses have been scheduled all over Upper Austria. This project addresses participants aged 15 or older with basic education needs. The areas of competence covered include the acquisition of German and English language skills, literacy (reading and writing), mathematical and digital skills, as well as learning skills. The project is open to all people needing basic education and will, from spring 2025 up to the end of 2028, reach between 344 and 430 participants. Depending on the participants' needs, a literacy course or a basic education course is held, which comprises 320 teaching units, including advisory offers for the participants (initial counselling, ongoing coaching, transition counselling).
Publics: people with limited educational opportunities, people with a low level of qualification

Programme: European Social Fund

Lehrgang zur Vorbereitung auf Pflichtschulabschluss und Berufseinstieg

In the context of this project, BFI Upper Austria organises a total of 23 one-year courses at seven locations in Upper Austria to enable (young) adults to prepare for the completion of compulsory school and entering the workforce. The course duration is 42 weeks of 27 hours each, including an aptitude assessment stage. The courses are oriented towards the curriculum defined by the Austrian Federal Ministry of Women, Science and Research, and cover the following subjects: German, English, mathematics, vocational guidance, science and technology, health and social care, as well as German as a foreign/second language. They specifically address educationally disadvantaged young people and young adults, often with an immigration background who are facing language-related and social obstacles, as well as lateral entrants into the Austrian educational system.

Publics: people with limited educational opportunities, people with a low level of qualification

Sprach- und Berufswerkstatt 2025/2026

This project is run at four locations in Upper Austria (Linz, Wels, Ried and Vöcklabruck), where the participants are offered individualised options for enhancing career-related foreign language skills, support with regard to entering the labour market and long-term employment, as well as specialised workshops for a number of occupational fields demanded in the labour market. Its concrete aims include the specific individual acquisition of (technical) language skills, as well as successful entry into the Upper Austrian labour market.

DUNJA Basisbildung

The goal of DUNJA is to teach basic education skills to speakers of a first language other than German and with no or little learning experience, and to support the participants with regard to independence and confidence in coping well with daily life in Austria. A relaxed, pleasant learning environment enables self-paced learning in order to prepare for future educational programmes and future careers. The areas of learning comprise German language skills such as: German as a second language, digital skills, mathematical skills and learning skills. The participants' needs and learning goals form the basis for how the course subjects are organised, and the respective areas of learning are implicitly linked with each other.

Publics: people with limited educational opportunities, people with a low level of qualification

Go2CoVE

Grenzüberschreitende Zusammenarbeit zum Aufbau eines Kompetenzzentrums zur Validierung von Berufserfahrung als erster Schritt für ein European Center of Vocational Excellence

Go2CoVE is based on the Centres of Vocational Excellence (CoVE) initiative of the EU aimed at the transnational establishment of local training centres for young people and adults to acquire high-quality vocational skills. In the context of the project, two partners conduct a self-assessment regarding compliance with the requirements for CoVE, oriented towards the criteria laid down by the EU, to systematically adapt their own guidance, training and validation programmes to the requirements of the European labour market. As its key output, a guideline with best-practice recommendations will be drawn up and published to assist other educational institutions in following this development pathway.

Publics: enterprises, educational policy institutions, interested institutions

Pflichtschulabschluss

This project offers an opportunity for completing compulsory school. Its main target group includes people who have not completed compulsory education or have not passed all subjects of the final year or have no school-leaving certificate recognised in Austria. Having completed compulsory school makes it easier to (re-)enter the workforce, particularly as far as permeability regarding further vocational training or school-based education is concerned. To enable the completion of compulsory school, six examination subjects are taught, paralleled by social education coaching.

Publics: people with limited educational opportunities, people with a low level of qualification

Potenzialentdecker:innen: Future Skills in Bayern und Salzburg

The goal of this project is to identify and develop skills within organisations in order to help unlock individual potential and to secure skilled labour in the long run. Two customised development programmes are being run in two organisations, one in Salzburg and one in Bavaria, with approximately 100 participants.

The project includes:

- documentation of individual skills in digital e-portfolios;
- recommendations for individual and organisational staff development;
- three information and networking events;
- at least 10 additional talks with SMEs and communities interested in the project;
- broad dissemination of results.

Publics: local authorities, small and medium enterprises

In Kooperation mit dem

Nachholen des Pflichtschulabschlusses

Young people and adults aged 15 or older are encouraged to complete compulsory school, i.e. year eight of compulsory education, which is a key pre-requisite for training and on the labour market. The project addresses people with interrupted educational careers or who have not completed compulsory school, and is aimed at enabling access to education, strengthening individual potential and pointing out sustainable education and career prospects.

In addition to subject-related preparation for the final exams, the project also offers comprehensive support: this includes learning guidance and skills promotion, assistance with regard to personal education plans, vocational orientation, as well as contact to regional networks. By individual support, practical learning offers and an encouraging learning environment, the participants can specifically prepare for further education and training, as well as for long-term integration into the labour market.

BFI Tirol (Tyrol)

Boardingkurse am BFI Tirol

The boarding courses run by BFI Tyrol cover the subjects of German, mathematics and English, to provide a comprehensive preparatory programme for starting the compulsory school completion course. The participants also have access to social pedagogy support, as well as learning and transition advice in line with their individual needs.

Publics: people with limited educational opportunities, people with a low level of qualification

Programme: European Social Fund

Project number: EB-1.2-282-T

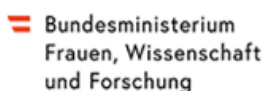

Project period: 01.07.2025-31.12.2028

Contractor: BFI Tirol Bildungs GmbH

Contact: Margit Kerschbaumer, BFI Tirol, Ing.-Eitzel-Straße 7, 6020 Innsbruck,

Tel.: +43/509/660 223, E-mail: margit.kerschbaumer@bfi-tirol.at, www.bfi-tirol.at

This project is financially supported by the European Social Fund, the Federal Ministry of Women, Science and Research and the province of Tyrol.

Pflichtschulabschluss am BFI Tirol

This preparatory programme of BFI Tyrol addresses adults aged 16 or older who would like to complete compulsory school (i.e. year eight of compulsory education). The programme consists of six modules run by a team of qualified teachers to enable an intensive preparation for the exam for learners outside the school system, in accordance with the Austrian Compulsory School Completion Exam Act. In the modules, the subjects of year eight are combined in a productive way and taught in accordance with a curriculum for adult learners. Five out of six exams are held directly at BFI Tyrol.

Publics: people with limited educational opportunities, people with a low level of qualification

Programme: European Social Fund

Project number: EB-3.1-405-T

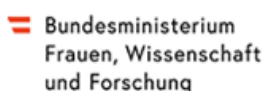

Project period: 01.07.2025-30.06.2029

This project is financially supported by the European Social Fund, the Federal Ministry of Women, Science and Research and the province of Tyrol.

Pole Position – Startklar für den Arbeitsmarkt

The Pole Position project of BFI Tyrol supports the participants' sustainable integration into the national labour market. The participants in the Pole Position vocational courses acquire job-related German language skills, basic knowledge and skills relevant for the workplace, as well as practical training and insight into working life. Finally, individual counselling is offered to foster the participants' self-assurance in labour market contexts, and in further education and training.

Publics: people entitled to asylum, immigrants, people entitled to subsidiary protection

Programme: AMIF

This Project is co-funded by the Asylum, Migration and Integration Fund of the European Union, the Austrian Federal Chancellery and the province of Tyrol.

 Bundeskanzleramt

BFI Vorarlberg

Pflichtschulabschluss in Level Up – Erwachsenenbildung

Angebote zum Nachholen des Pflichtschulabschlusses in Level Up - Erwachsenenbildung

This project is aimed at preparing young people and young adults for the completion of compulsory school, in accordance with the Federal Act as published in BGBl I No 72/2012. Its target group includes educationally disadvantaged people, many of whom have an immigration or refugee background, who would like to complete compulsory school. The focus is on competencies, as well as individual support oriented towards practical life, to enhance both school-related and personal skills and to highlight possible educational and career prospects.

Publics: people with limited educational opportunities, people with a low level of qualification

This project is financially supported by the European Social Fund, the Federal Ministry of Women, Science and Research and the province of Vorarlberg.

BFI Wien (Vienna)

Brückenkurse am BFI Wien

The goal of these courses is to acquire the skills necessary for the transition to a preparatory programme for compulsory school completion or other training programmes. They are delivered over three or four months with 24 lessons per week. Each course comprises the modules of learning skills, German, mathematics, English and digital skills. The individual modules are tailored in accordance with the participants' specific needs, with the general goal of building 'bridges' for taking the next step. The focuses defined for the individual courses depend on the prior skills assessment, and thus on the participants.

Publics: immigrants

GreenTech Plus: Digitalisierung und innovative Technologien im Grünen Sektor: Grenzüberschreitende Entwicklungen und Wissensaustausch

Green Tech Plus addresses (young) entrepreneurs and their staff in the green industry, with the focus on farming and agricultural economy in order to enhance their digital skills. The training modules that are being developed to train at least 50 multipliers include precision farming and sustainable farming, as well as AI and innovative technologies. In addition, the GreenTech web platform is made available as a freely accessible portal for all training subjects as well as for networking and exchange. A living lab will be established as a competence centre for future-oriented technologies in agriculture (themes covered: soil sensor technology, robotics, water management).

Publics: (young) entrepreneurs, small and medium enterprises

IFIT NEXT

Kompetenzenentwicklung und Bewusstseinsförderung der Themenbereiche Industrie 4.0, Green Energy und Digitale Bürgerschaft

IFIT-Next focuses on cross-border cooperation to tackle the challenges of the green and digital transitions. The main goal of the project is to further workers' competencies and skills in the areas of Industry 4.0 and green energy and to enhance their digital skills as well as their awareness of environmental matters. Through a close cooperation between the partner institutions and the labour market, the project subjects are specifically adapted to current demands. The project will contribute to sustainability, improvement of digital skills and strong networks at European level.

Publics: workers, unemployed people, apprentices, pupils

Programme: INTERREG SKAT

Transnational partner: Duálna akadémia z.z.p.o., Slovakia, www.dualnaakademia.sk

National partner: Berufsförderungsinstitut Burgenland, www.bfi-burgenland.at

Both BFI Burgenland and BFI Vienna are partner organisations in this project. It has therefore been listed twice in this EU project compendium.

SkillsResilience4EU

Resilienz durch Umschulung und Weiterbildung für europäische Arbeitsmärkte im Wandel

SkillsResilience4EU is a Horizon Europe research project on resilience competencies in the European labour market. The digital and ecological transformations have brought about far-reaching changes in the labour markets, with effects differing according to industry, region and social group, and which may undermine social cohesion. The project analyses in which way the resilience of European labour markets can be underpinned in view of multiple, intensifying crises. It develops a novel analytical view on the combined effects of the twin transformation and additional macroeconomic drivers, and points to the importance of taking coordinated national and international political measures to enable adaptability and long-term sustainability.
